Main practice

2003 -

Inventor of the halldorophone and lead designer. Halldór´s work with the instrument has gained world-wide recognition in the last few years. His effort on the project is focused on two main strands of activity:

Promoting the instrument and tending to it´s culture of use through developing numerous collaborations with individual musicians and music institutions across Europe and America. These involve artistic involvement in projects and providing musicians with access to the instrument.

Product development and promotion through the company Dorophone ehf. formed in 2021, through which halldorophones are being built on commission for customers worldwide.

Current position

2021 -

Researcher at the Intelligent Instruments Lab, an ERC funded project housed at the University of Iceland.

Previous positions

2012 - 2017

Adjunct of product design Iceland University of the Arts. Overlapping as workshop technician for the Design Department at the IUA

Education

2012 - 2017

PhD at the University of Sussex, Department of Music under the supervision of Thor Magnusson and Chris Kiefer.
- *Not submitted.*

2005 - 2008

MFA studies at the department of Applied art and design at The University of Art and Design Helsinki (Formerly TAIK, currently Aalto).

2005 - 2006

MFA studies at The Finnish Academy of Fine Arts, Department of Time and Space.

2001 - 2005

BFA studies at The Finnish Academy of Fine Arts, Department of Time and Space.
